► **VISUAL DOMINANCE**

For non-animated creatives on digital formats

DOMINANCE STRATEGY

A dominance strategy allows your campaign visual to be displayed for a longer period on digital screens.

Important: Visuals made up of pixels that remain displayed in the same position for an extended period may permanently damage the screen (image retention).

- **Option 1:** Provide at least two different creatives, displayed for the same duration. Pixel positions must vary between the two visuals, including background colors and graphic elements.
- **Option 2:** Provide at least two different creatives, including one interstitial visual, allowing the dominance of the primary visual to be maintained.

*Additional fees apply. Please see details with your Account Manager.

DOMINANT VISUAL

2nd VISUAL (OPTION 1)

- Different color from the dominant visual.
- Text and images positioned differently compared to the dominant visual.

INTERSTITIAL (OPTION 2)

- Different color from the dominant visual.
- Logo positioned differently compared to the dominant visual.

2nd VISUAL Non compliant

- Although the color differs from the dominant visual, the position of the text, image, and logo is identical. **This 2nd visual is non-compliant and will be rejected.**
